Organize & Catalog

- Be productive right away as ACDSee Pro 2.5 helps you automatically import, rename and categorize your new image files.
- Organize your images using custom categories, IPTC/EXIF/XMP metadata, keywords, ratings and more.

Browse & Search

- View your images with the fastest image viewing technology on the market.
- Effortlessly sort, cull and compare images to select the best ones for use in projects.
- Browse your live folder tree, leverage your metadata, search by date, or enter multi-word phrases in the Quick Search bar to retrieve critical images.

Process

- Process your RAW files non-destructively, with outstanding image quality, demosaicing and white balance.
- Maximize your time – continue working while your RAW images process in the background.

- Control all aspects of your images with advanced editing tools. Simultaneously adjust color, correct exposure, fix shadows and highlights, sharpen, add metadata, rename, resize and convert batches of images.

Present

- Create presentation slide shows in multiple output formats.
- Conveniently share images via email or on the web.
- Design PowerPoint presentations, complete with captions and titles.
- Save paper and ink with optimized templates, or upload images to online photo sites.

Archive

- Embed custom metadata in your images' XMP fields.
- Archive your image assets to .zip folders, CDs and DVDs.
- Synchronize with external hard drives.
