If you shoot and manage camera RAW images, you need ACDSee Pro 2, the world's most powerful photo manager. View and process your RAW files as fast as JPEGs. Catalog, batch edit, present, and archive all the digital assets in your library with precision and ease. ACDSee Pro 2 has everything you need to manage everything your organization shoots.

## Organize & Catalog

Effectively manage your digital assets with powerful and flexible cataloguing options. Organize your photos using custom categories, IPTC/EXIF/XMP metadata, keywords, ratings and more.

## Process

Process your RAW files with leading edge, non-destructive technology. Control all aspects of your images with advanced editing tools. Save time by batch editing your images - including your RAW files. Adjust color, correct exposure, fix shadows and highlights, sharpen, add metadata, rename, resize and convert images to a new file format, and more - all at once.

## Edit

Fix common photo flaws such as red-eye and blemishes with the click of a mouse. Rescue important shots with the shadow/highlights tool that corrects lighting issues. Rotate, rename, and resize groups of images all at once

## Present

Create presentation slideshows in multiple output formats. Save paper and ink with optimized templates, or upload images to online photo sites. Conveniently share images via email or on the web.

## Archive

Protect and preserve your metadata by embedding it in the industry-standard DNG format. Archive your image assets to .zip folders, CDs, DVDs. Synchronize with external hard drives.
