

ACDSee Pro 3 tutorials: Uploading images to your ACDSee Online account

1 Logging into your account

2 Finding images

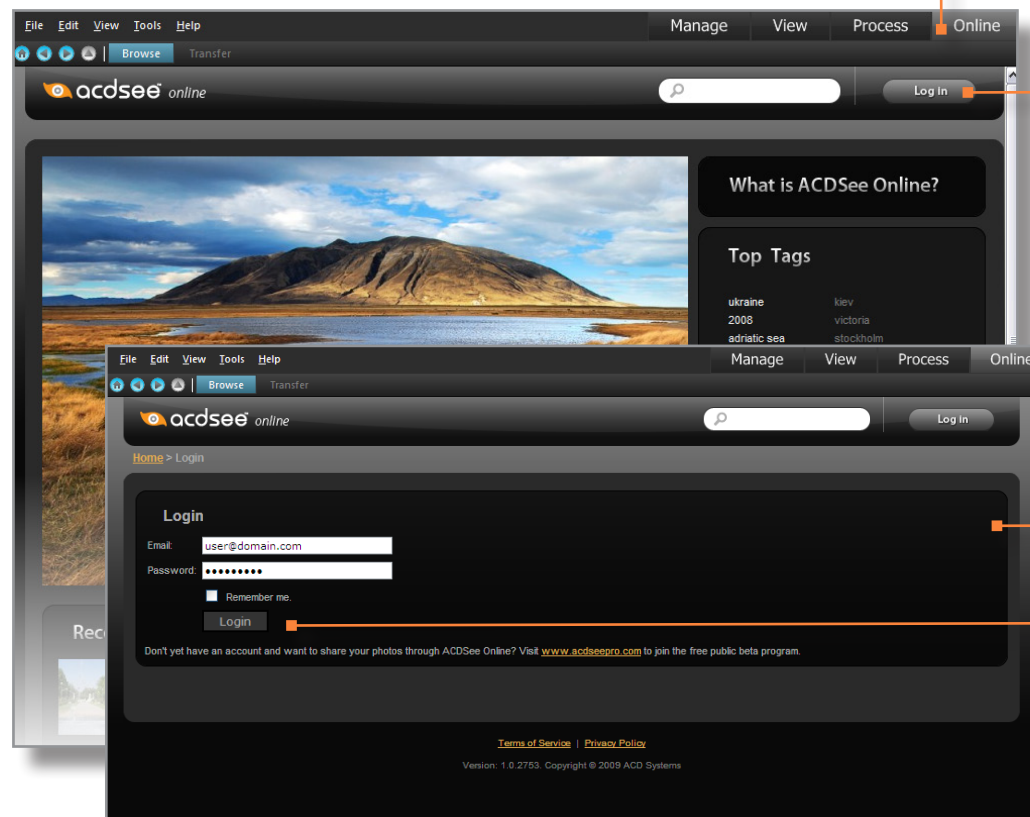

3 Uploading images

4 Monitoring uploads

5 Key concepts

Use Online mode to upload your images to your ACDSee Online account. ACDSee Online is an image sharing and storage service available to ACDSee Pro 3 users. If you haven't created an account, the first page shown is the account creation page. After you have created your account, you are ready to begin uploading images.

To begin, click **Online** mode.

Click **Login** to display the Login page.

Enter your email and password, and click **Login**.

5 Key concepts

Click **Transfer**.

In Transfer, the top half of the screen displays the images in your ACDSee Online account.

The bottom half of the screen displays images on your computer.

Navigate to the images you want to upload.

5 Key concepts

Select an upload size.

It is recommended that you select the lowest resolution (1024x768). This results in faster transfers and allows you to upload more photos to your account.

Select images from the bottom half of the screen and click and drag them up into the top half of the screen. To select images, you can:

- Press **CTRL + click** to select specific images.
- Press **SHIFT + click** to select a group of images.
- Click and drag to select a group of images.
- Press **CTRL + A** to select all images.

You can also drag and drop folders into your ACDSee Online account.

You can view the progress of your upload in the status bar.

Click **Transfer Manager** to view the upload progress of each image.

When your upload is complete, the status bar will disappear and the status of each image in the Transfer Manager will be shown as Completed. Your uploaded images and folders are set to private by default.
